Education

BOSTON COLLEGE

Bachelor of Art in Computer Science

Chestnut Hill, MA

Anticipated graduation: May 2026

Relevant Coursework: Data Structures and Algorithms, Software Engineering, Web Dev, Computer Systems

Academic Projects

Peer Assessment Web Application: Ctrl-Alt-Elite *Software Engineering: Spring 2025*

([Github](#))

- Developed a **Django-based web platform** for peer evaluation in team-based academic settings.
- **Key Contributions:** Collaborated with a team to build a **full-stack web application** for student peer assessments using Likert-scale and open-ended questions. Used **GitHub** for version control and collaboration, coordinating commits, resolving merge conflicts, and adapting to each member's coding style to maintain consistency. Contributed to **admin panel** features that managed evaluations and visualized responses in real time, ensuring **reliable data handling** and a smooth user experience through **Django's ORM**, **custom forms**, and **validation tools**.

Technologies Used: **GitHub, Python, Django, HTML, CSS, JavaScript, SQLite.**

Community Engagement Website for Clean Air Green Corridor *Web Dev: Fall 2024*

([Github](#), [Live Site](#))

- **Designed and developed a website** to support the **Clean Air Green Corridor initiative**, empowering community members in Washington Heights to map hazards (e.g., litter, needles) and **highlight positive neighborhood aspects**.
- **Key Contributions:** Took a **lead role** in a team project to develop an interactive mapping tool that tracked and visualized community-reported issues, integrating user-friendly features to enhance collaboration among residents and volunteers. **Led stakeholder interviews** to gather accurate project requirements and define a clear structure for development. Coordinated the team by **dividing tasks**, managing timelines, and ensuring efficient collaboration to deliver high-quality, effective code aligned with organizational goals.

Technologies Used: **HTML, CSS, JavaScript.**

Python-Based Word Cloud Analysis Of Comedy Vs. Horror Scripts *Text Processing: Fall 2023*

([Github](#))

- Designed a Python-based **script analysis tool** to compare **linguistic patterns** in **movie scripts**.
- **Key Contributions:** Collaborated with a team to analyze comedy and horror scripts using **text-processing techniques**, generating genre-specific word clouds to visualize frequent terms. Leveraged **web scraping and NLP** to extract and process data, **identifying distinct and overlapping language patterns** to provide insights into screenwriting trends.

Technologies Used: **GitHub, Python, requests, BeautifulSoup (bs4), NLTK, matplotlib.**

Experience

CARBON FIBER MUSIC

Miami, FL

Web Design Intern

May 2025 - December 2025

Built and maintained responsive pages for the label and its artists using HTML, CSS, and JavaScript. Served as the **main developer** for the [ESCOL Network](#) website, taking the **lead on its design and implementation**. Prototyped designs in Figma and implemented **marketing funnels** using ClickFunnels to support campaigns and content launches. Designed site architecture and user flows that **efficiently guided visitors toward engaging with the brand and converting into clients**, aligning the website's structure with marketing objectives.

FOOT LOCKER INC.

New York, NY

Sales Associate

May 2023 - June 2023

Assisted in in-store sales by actively **communicating with customers** to understand their needs and **guide them toward ideal products**, building lasting relationships through attentive and personalized service. Managed packaging and shipping for online orders, processing 25+ orders daily while ensuring timely pickups and deliveries. Provided recommendations on **store layout** to improve customer flow and product visibility, and analyzed **market trends** to identify key patterns and suggest strategies for increasing sales.

Additional Skills

Languages/Frameworks: **GitHub, Python:** Django, BeautifulSoup, NLTK, matplotlib; **JavaScript:** React; **Java:** HTM5, **CSS:** Bootstrap; **Swift;** **C;** **SQLite;** **Spanish (Fluent)**

Tools: Figma, ClickFunnels, Excel
